

721 - RESEARCHER, REGIONAL WOOD MANUFACTURING ADVANCED WOOD MANUFACTURING

Prince George and Area, BC

WE'RE
HIRING

ABOUT FPINNOVATIONS

FPIInnovations is a private not-for-profit organization that specializes in the creation of solutions in support of the Canadian forest sector's global competitiveness. It is ideally positioned to perform state-of-the-art research, develop advanced technologies, and deliver innovative solutions to complex problems for every area of the sector's value chain, from forest operations to consumer and industrial products.

We're currently looking for a researcher who will apply their manufacturing knowledge to provide support and advice specific to solid wood products manufacturing, the development of new wood-based products, and recommending and assisting with implementation of new technology to improve operational performance in a wood products environment.

Reporting to the Manager, Advanced Wood Manufacturing the person would work closely with members, partners, and research teams across Canada to deliver impactful programs, provide knowledge transfer, and increase membership base in the wood products sector.

RESPONSIBILITIES

- Provide focused advice and project delivery to members and partners around sawmilling, wood drying, and process control
- Improve business performance by recommending and assisting with the implementation of new technology or practices that contribute to the growth of the industry
- Analyze statistics, prepare reports, and present information to diverse audiences
- Increase FPIInnovations' membership base and build strong networks and alliances
- Provide visibility and support for FPIInnovations' activities
- Transfer knowledge and results from FPIInnovations' research programs to industry
- Manage specific projects within a collaborative team

FPIInnovations respects equal opportunities in employment.

QUALIFICATIONS & SKILLS

- Degree in Industrial Engineering, Wood Science, Wood Products technology or related field and 5 to 7 years' experience related to current manufacturing technologies and promotion methods (or equivalent combination of education and experience)
- Advanced knowledge of sawmilling, drying, and process control for the wood products sector
- Excellent communication and interpersonal skills
- Experience providing onsite technical support to clients
- Ability to work with minimal supervision and show ongoing initiative
- Demonstrate innovative problem solving
- Proven ability to build strong networks and client relations across diverse groups
- Works well alone; works even better with others
- Familiar with equipment suppliers and other organizations
